Department of Biotechnology

Academic year 2025-2026 (Odd Sem)

Date	December, 2025	Maximum Marks	10 + 50
Course Code	**BT232TC**	Duration	120 min
Sem	III SEMESTER	Closed Book Offline Quiz and Test 2	

BIOSAFETY STANDARDS AND ETHICS (BASKET COURSE)

Answer all questions in Part A & Part B, Answer Part A in first two pages in sequence only

Part A

Sl No	Questions	M	BT-L	CO
1	List out the types of licenses of FSSAI.	1	1	3
2	Name two water borne diseases and responsible organisms	1	1	3
3	How do you identify the food spoilage?	1	2	3
4	Expand GLP,GAP,FSSAI and HACCP	1	1	3
5	What is 2hr- 4hr rule for food storage	1	2	4
6	Define blanching method of food processing	1	2	4
7	In FSSAI code what is the 4th digit represent	1	3	3
8	After sterilization of canned foods, what will be the shelf life?	1	1	4
9	Define allergens give examples	1	1	3
10	What are food preservatives? give examples	1	1	

Part B

Sl. No	Questions (Test)	M	BT -L	CO
1	The various steps involved during the processing of raw rice is mentioned below. Please mention type of hazard and how to prevent hazards in each step **Pre-Cleaning**: Paddy is cleaned to remove straw, dust, stones, and other impurities using screens and gravity separators to protect machinery and improve quality. **De-Stoning**: Specific machines separate heavy impurities like stones from the grain. **Dehulling (Husking)**: A sheller removes the inedible husk from the paddy, creating brown rice (bran layer intact). **Paddy Separation**: Unhusked paddy is separated from the brown rice for re-milling, ensuring uniformity. **Whitening (Milling)**: Brown rice is milled to gradually remove the bran layer and germ, producing white rice. **Polishing**: An optional step that adds shine and removes final traces of bran for better appearance. **Grading & Sorting**: Rice is separated by size (head rice, broken rice) and quality, often using color sorters. **Packaging**: Final rice is weighed and packed for storage and sale.	10	3	3
2	Elaborate the principles of HACCP in detail	10	3	4
3	Illustrate the GMP and GLP followed in food industries	10	3	3
4	Explain the various testing methods and equipments used in food testing laboratories	10	2	3
5	Discuss in detail the packaging technology, add a note on innovative packing methods	10	2	3
